

REACT COMPONENTS LIST

1. Amazon.com
2. GhorerBazar.com
3. Ali Baba.com

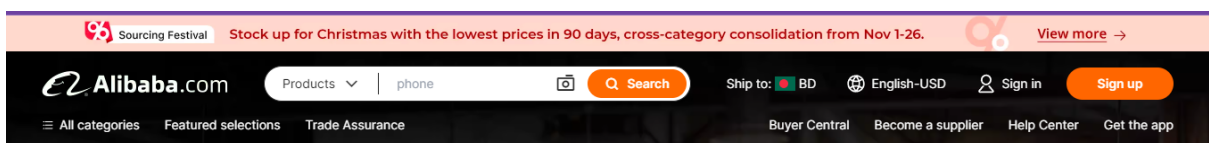

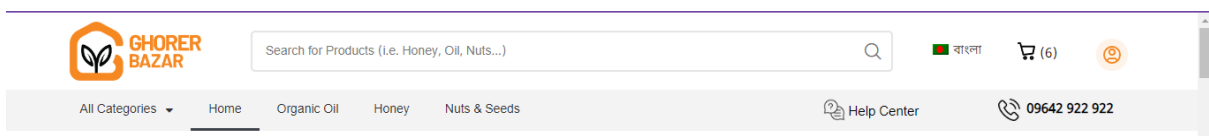

What is Components ?

Ans: Components are like functions that return HTML elements.

3 types of component:

1. Stand-alone component.
⇒ Structure is different from other components like the header and footer section.
2. Single component.
⇒ Structure same but data is different. Similar in looks but different in data.
3. Container component.
⇒ Similar as the parent container

1. Stand alon component:

2. Single Component:
